

FOR IMMEDIATE RELEASE

**NUVENTIX NAMES TOM DALTON
VICE PRESIDENT OF WORLDWIDE SALES**

*Mr. Dalton Brings Global Sales Experience to Nuventix Team
as LED Thermal Management Accelerates Worldwide*

Austin, TX – January 12, 2010 – Nuventix, Inc., innovator of SynJet® thermal management solutions, today announced the expansion of its executive team to include Tom Dalton as Vice President of Worldwide Sales. Mr. Dalton joins Nuventix from industry leaders such as Honeywell and Tyco Electronics where he served in global executive management roles. Mr. Dalton will be responsible for expanding customer relationships via direct and indirect sales organizations, field applications engineering and the insides sales support team.

“The demand for thermal management solutions for high powered LED lighting has never been higher. Tom’s experience and proven track record are a huge win for Nuventix and will help us continue the adoption of our innovative [LED thermal management technology](#),” said Jim Balthazar, president and CEO, Nuventix.

Mr. Dalton brings over 20 years of global sales and account management experience to Nuventix including positions with Tyco, Intersil and Lucent. Mr. Dalton’s ability to facilitate integration of key thermal management technology with other complex systems enables faster time to market for new products. In addition to his multinational corporate experience, Mr. Dalton also co-founded the successful start-up company, USBid, where he still serves as a Board member.

“I am excited to take on this new challenge with Nuventix. SynJet technology is revolutionizing the thermal management industry and enables product designs that bring LEDs to market faster with reliability that exceeds anything out there,” said Tom Dalton, vice president worldwide sales, Nuventix. “It’s a dynamic time to be working with a cutting edge provider of such an innovative, clean technology.”

Mr. Dalton earned his MBA from the University of Southern California and received his bachelor of science in electrical engineering, graduating magna cum laude, from the University of Missouri.

About Nuventix

Nuventix is revolutionizing [active thermal management](#) of consumer electronics, LED lighting, medical, telecommunications, automotive and other electronics with patented, highly adaptable, quiet and reliable cooling devices that efficiently – and directly – dissipate heat from any surface. The [patented SynJet technology](#) enables the most reliable and flexible air cooling solutions available today. The Austin, TX-based company is venture-backed and led by an experienced team of senior executives with a breadth of experience building and leading thermal and startup companies to success.
